STEP 1

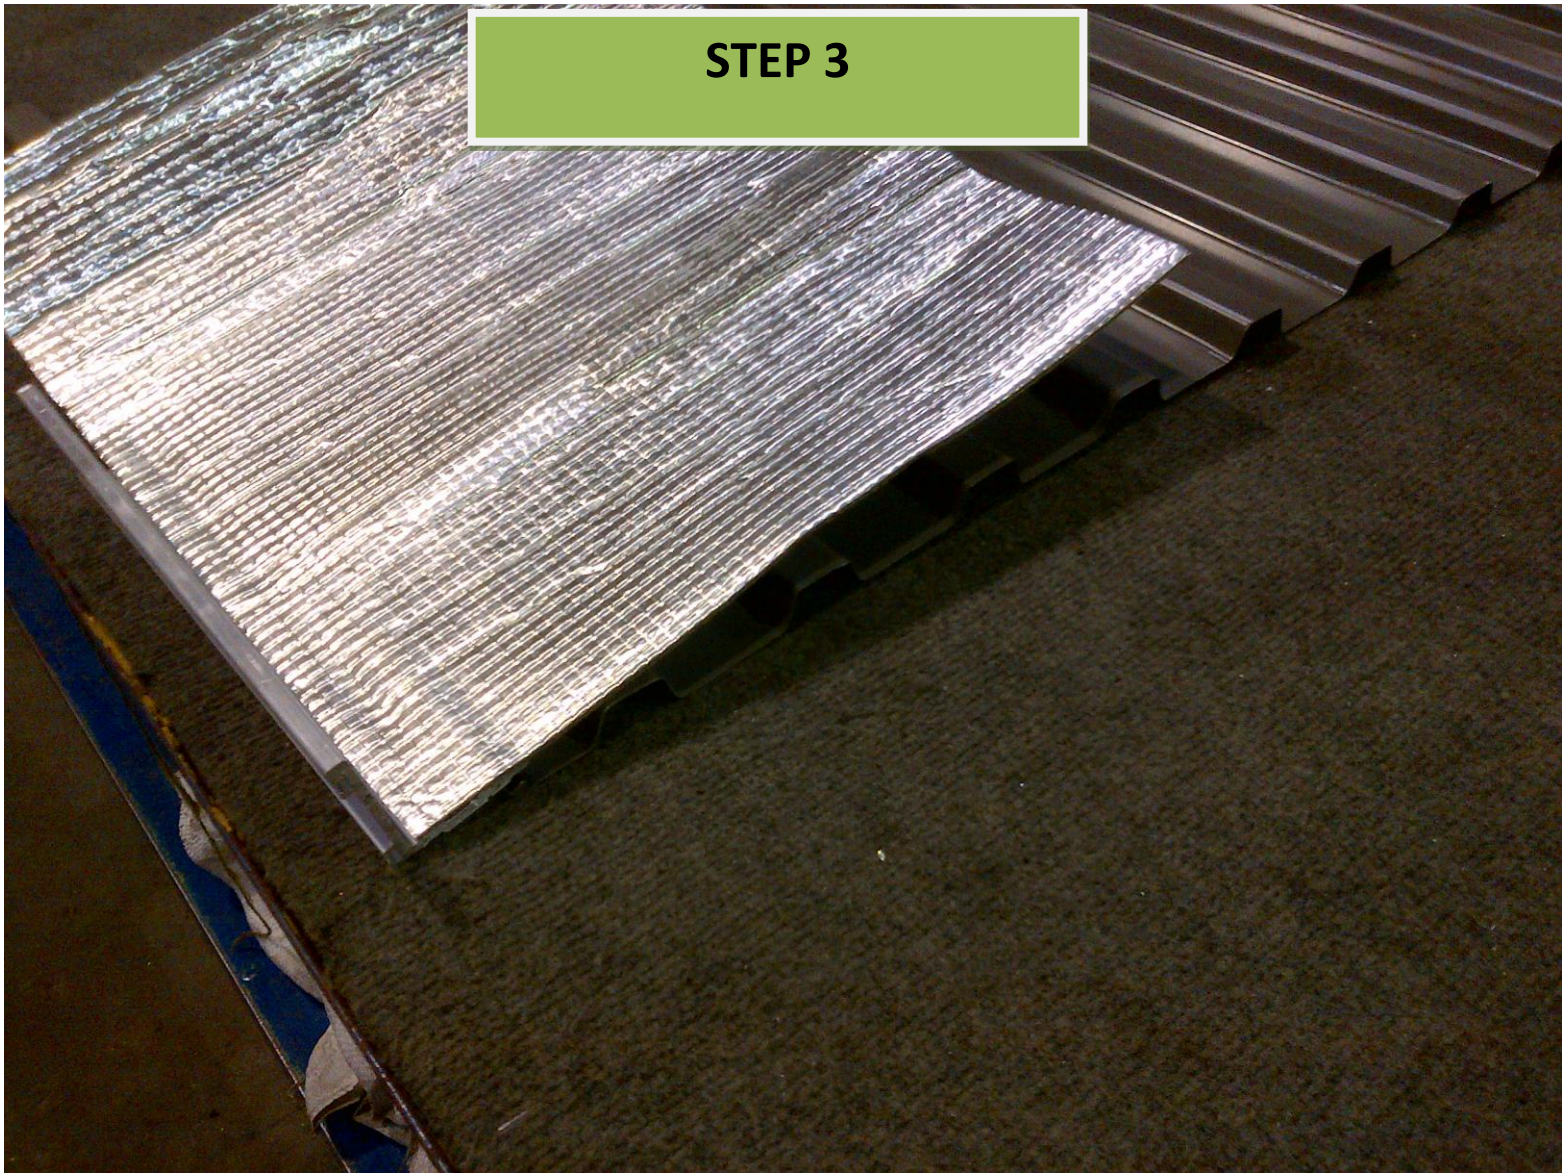

- Make sure the back of the door is clean
- Wipe with a mild degreaser or alcohol solution

STEP 2

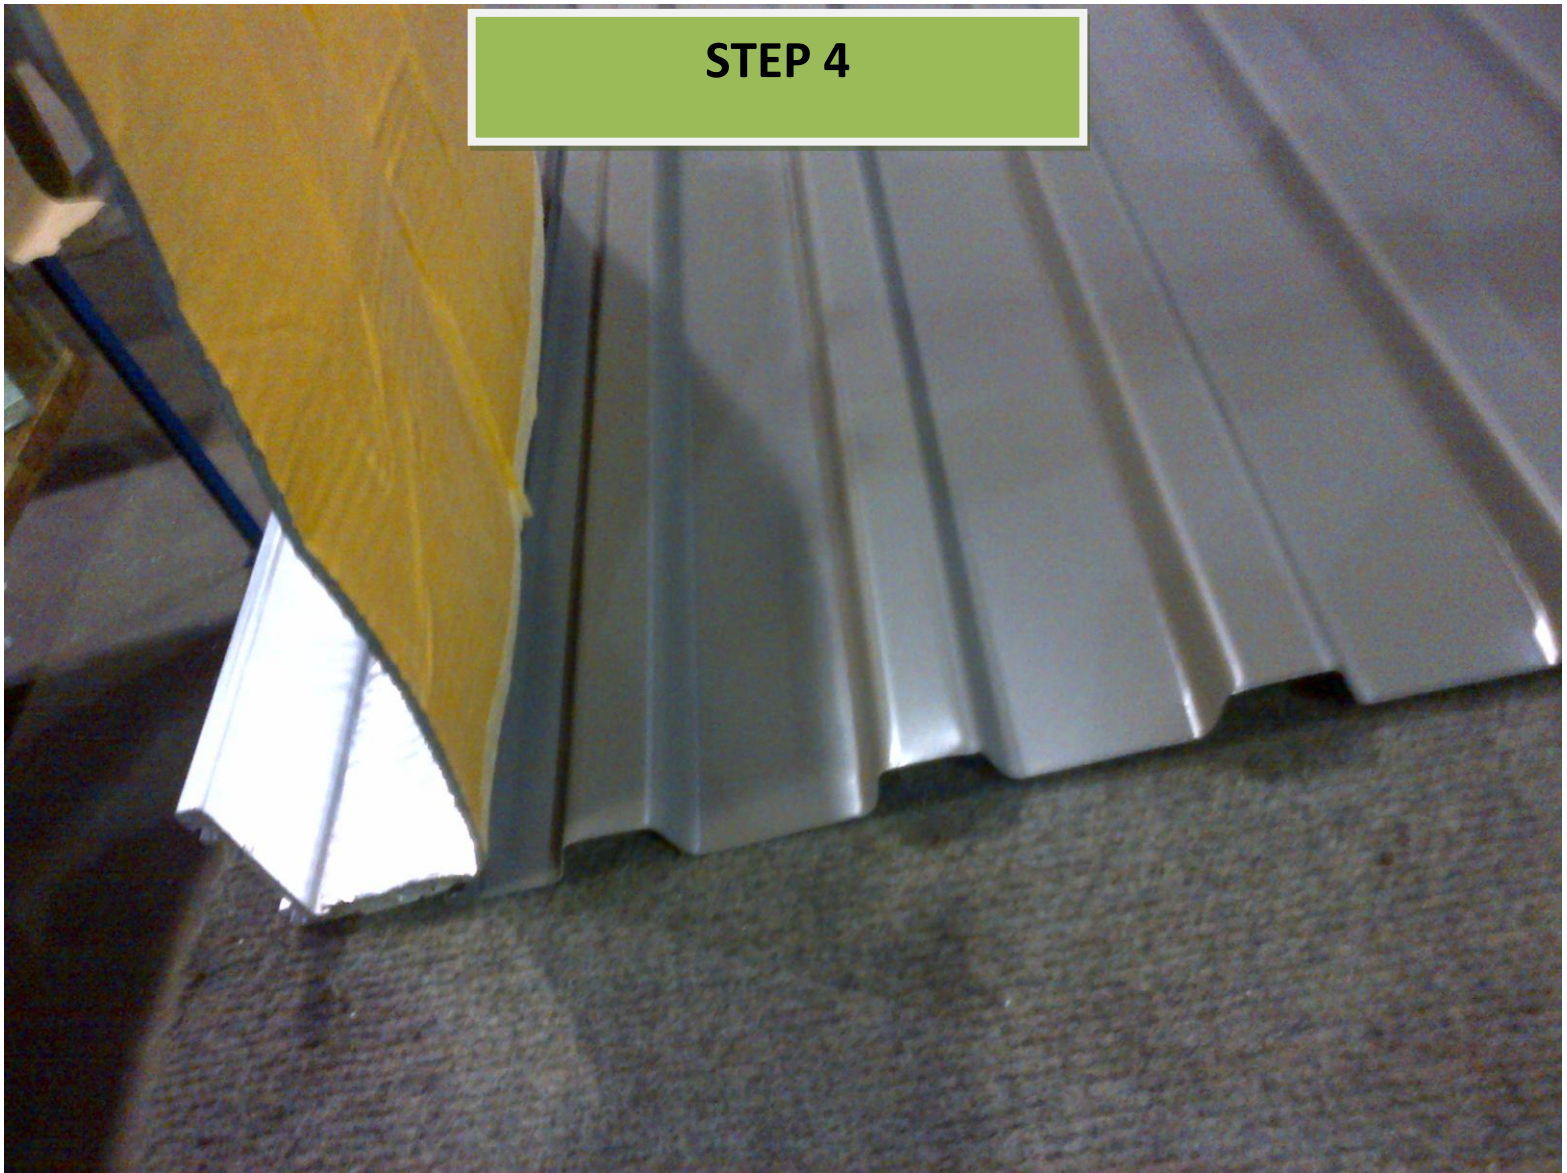

- Peel about 4 inches of backing along the bottom edge of the insulation

STEP 3

- Line up the sticky edge with the aluminum bottom rail of the door and press firmly

STEP 4

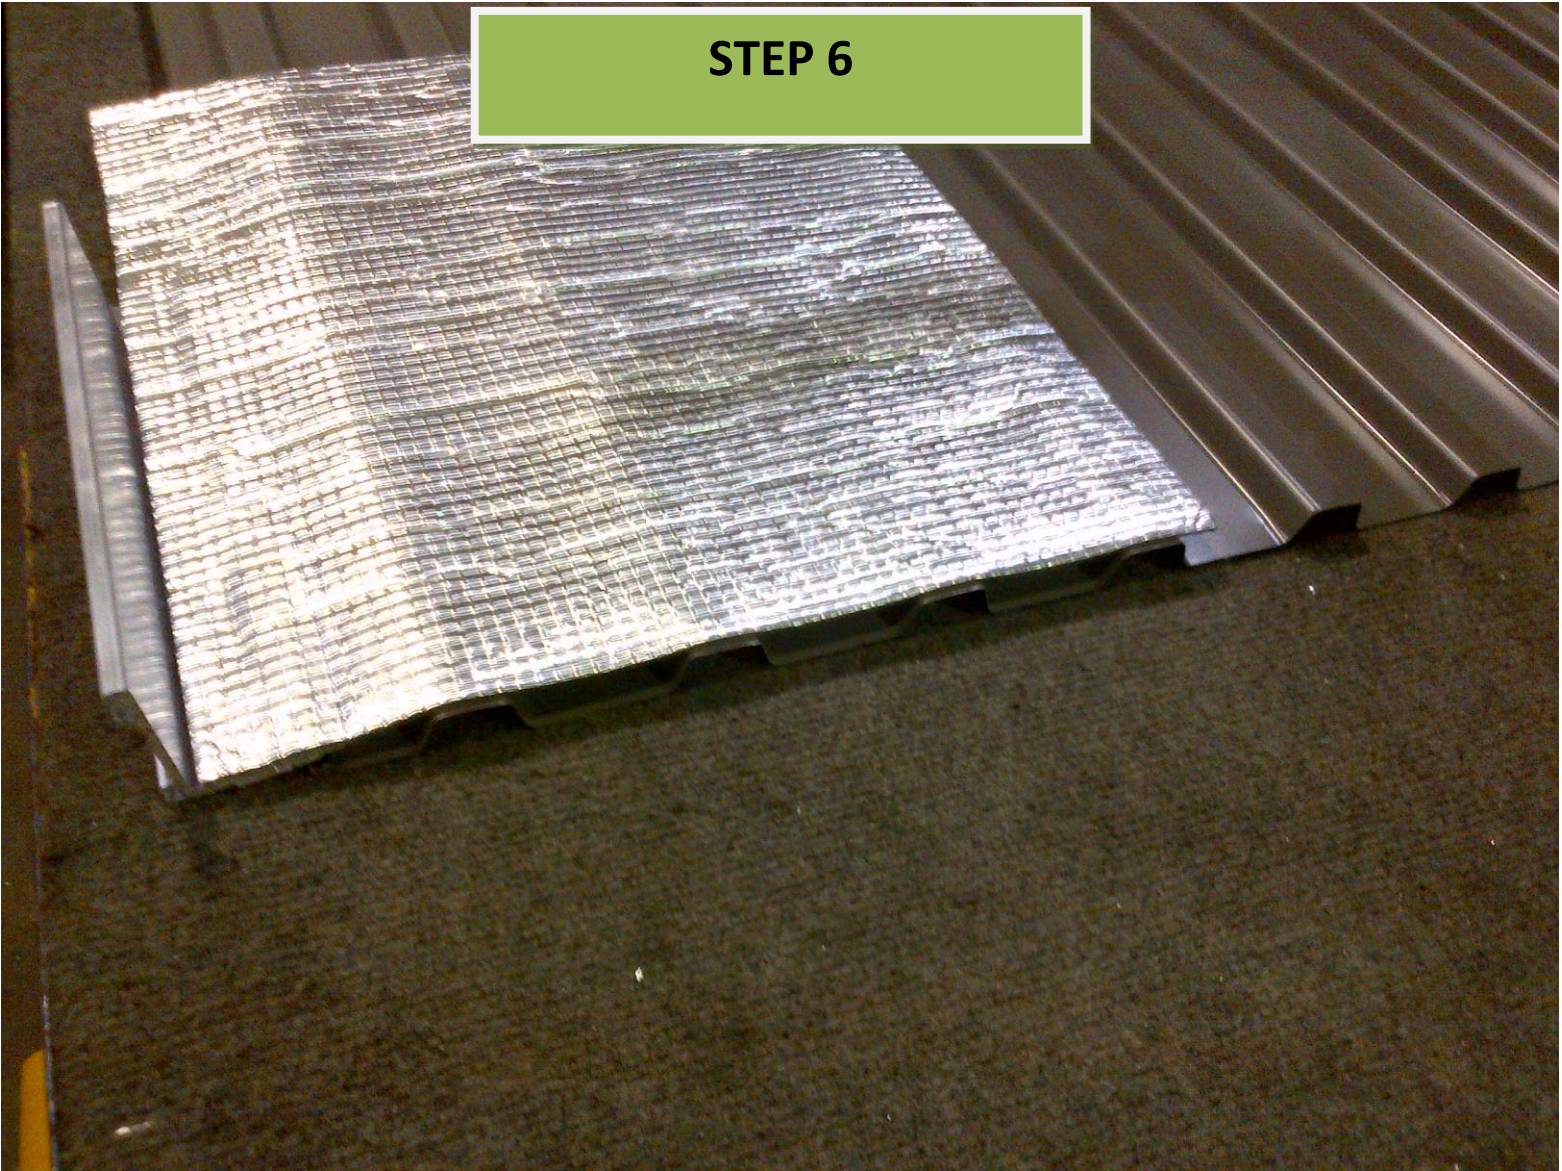

- Pull back the insulation material

STEP 5

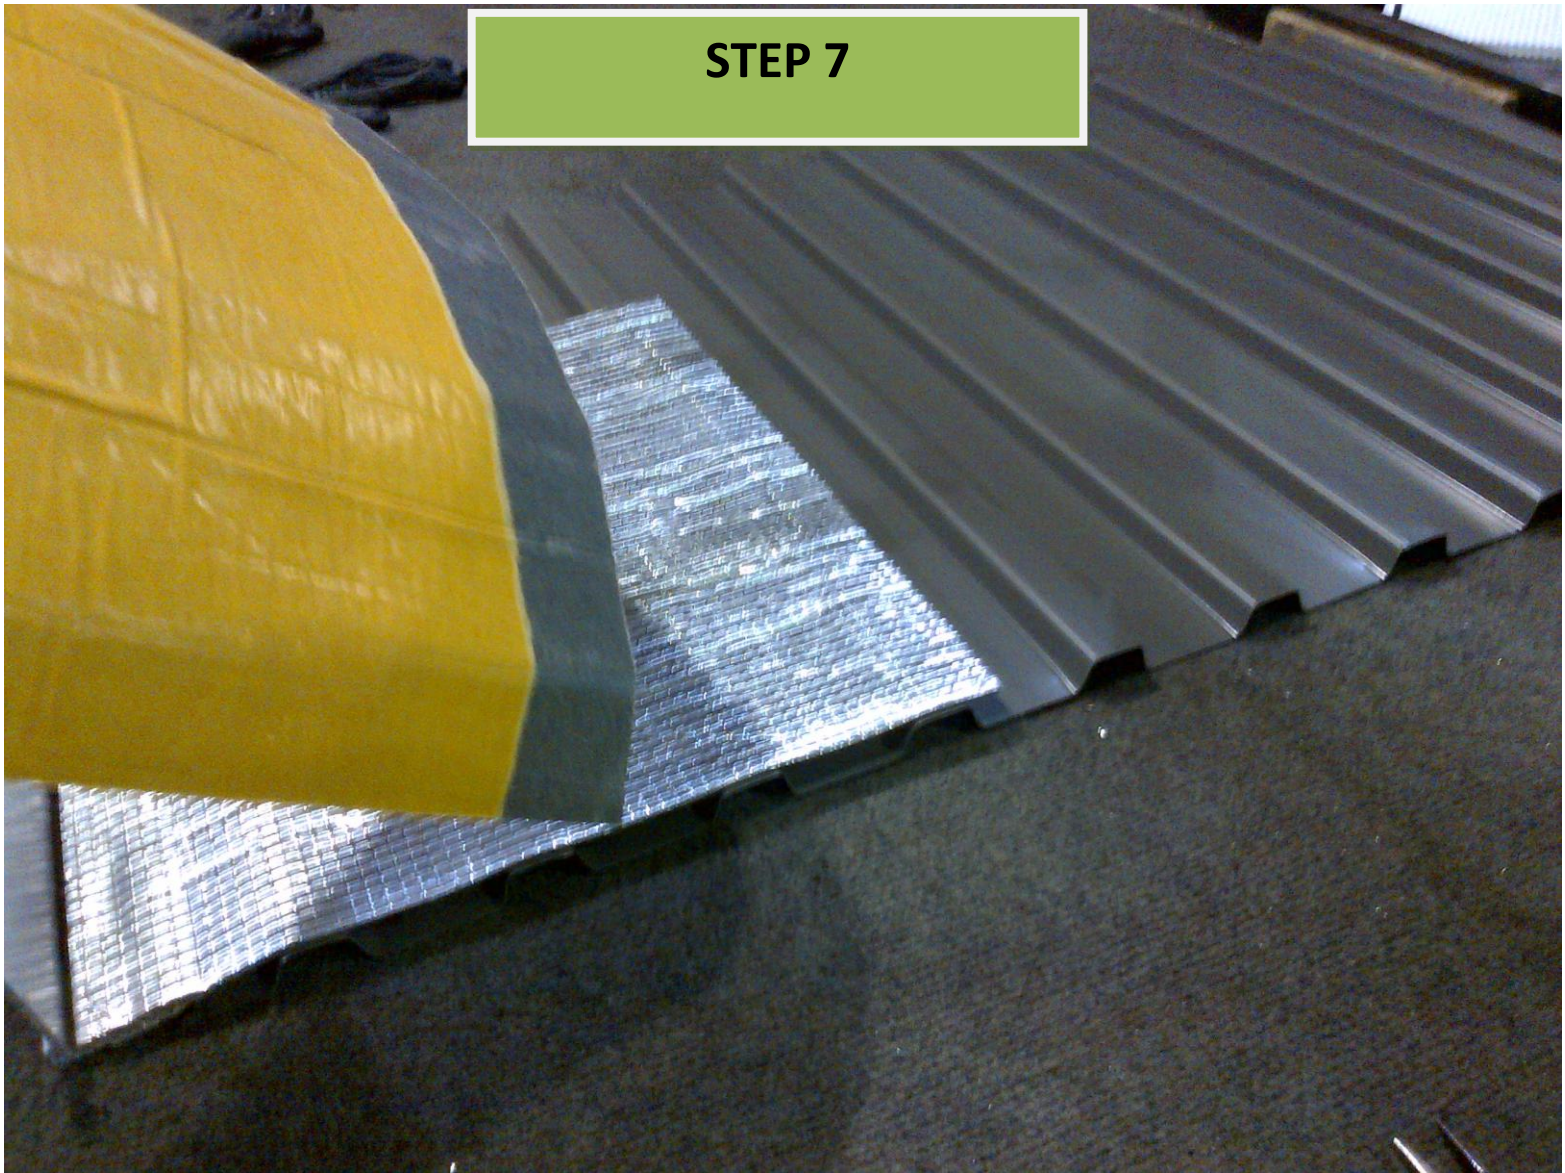

- Peel off the rest of the paper backing

STEP 6

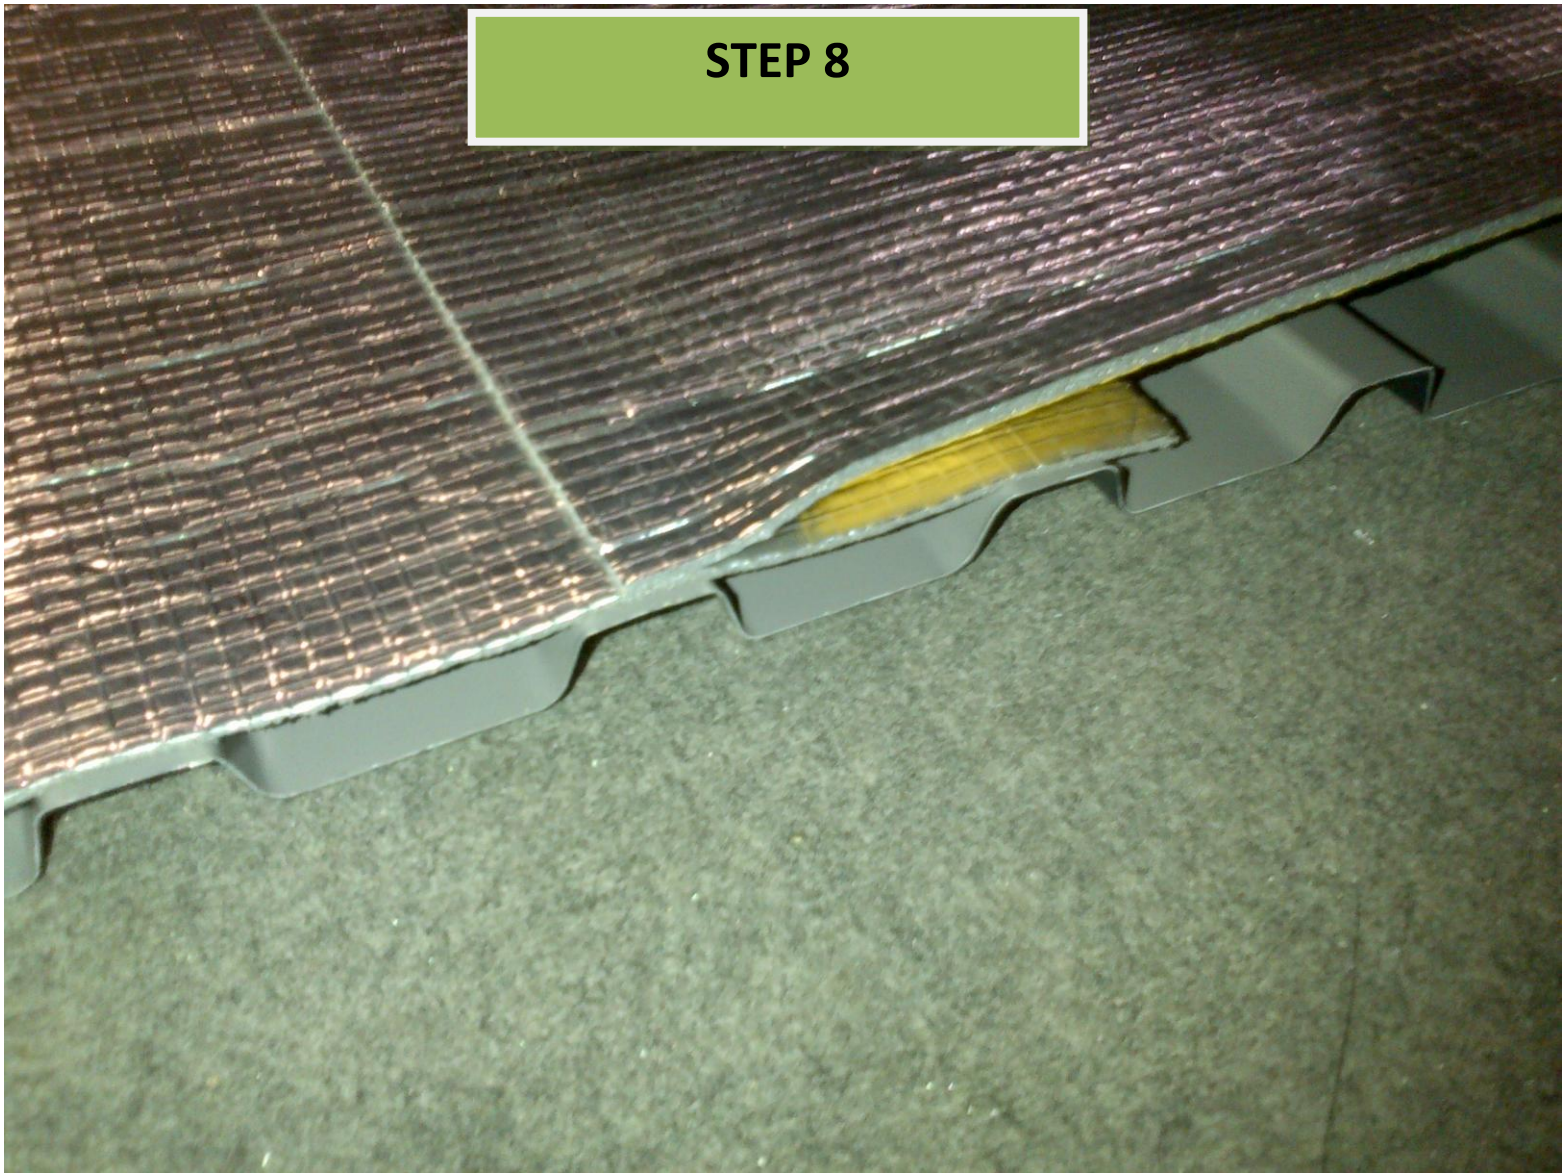

- Working from the center, then up and towards the sides, firmly press the insulation against the door

STEP 7

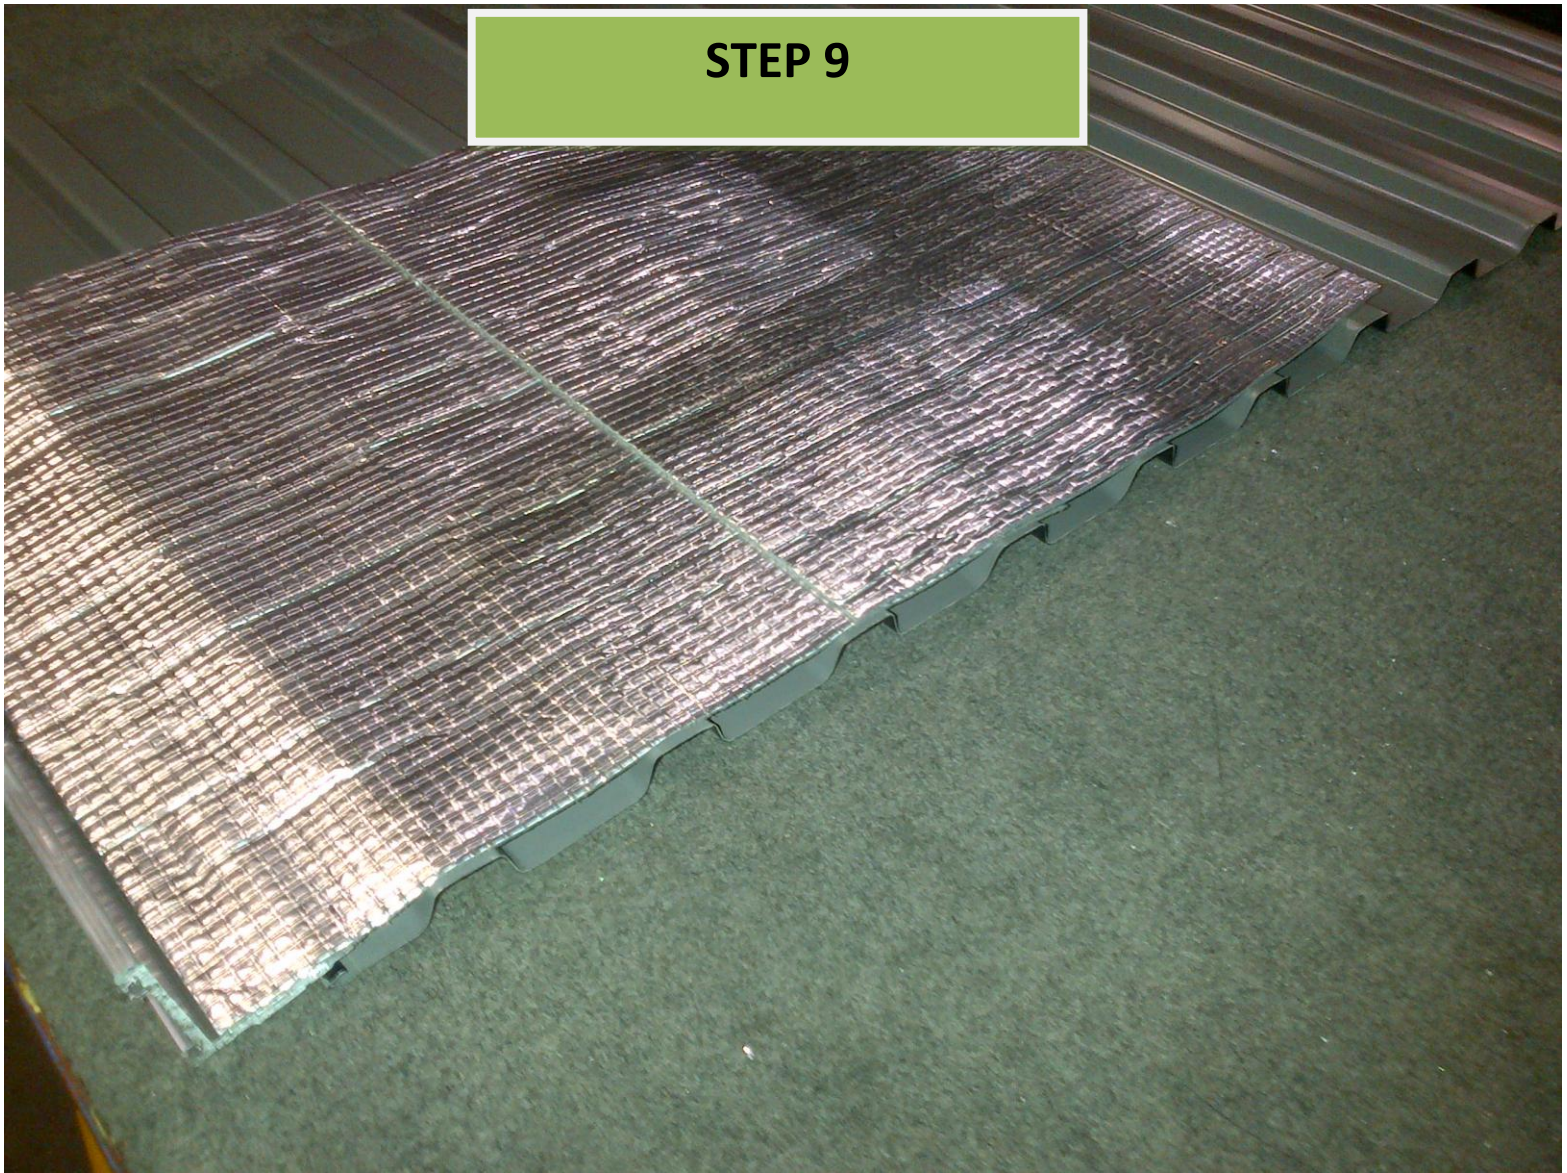

- Repeat step 2 for the next sheet of insulation

STEP 8

- Overlap your previous sheet by at least one corrugation
- Make sure you are level and press bottom firmly against door

STEP 9

- Repeat step 5 and step 6
