

RESETTING LIMITS on GDO6v4

The control panel is below the light of the motor

1. Erase limits
 - Depress SET and unplug motor at the same time
 - Continue holding SET and plug the motor in again
 - Hold SET until the repeating twitter has stopped
2. Pull red cord – dis-engage motor
3. Pull curtain down to half open
4. Pull red cord – re-engage motor
5. On the Motor find the Red (-) and Green light (+)

**** If the motor is mounted on the left side of the door - press OPERATE button once to change direction**

6. The Red light MINUS (-) button should be flashing
7. Press MINUS until the door is closed tight, but not hard
8. Press SET once
9. The GREEN light PLUS (+) button should be flashing
10. Press PLUS until the door is just short of the STOPPER
11. Press SET once again

Now the door will automatically complete a full revolution (down then up)
